

The amount of violence, sex, and vulgar language shown on TV during both the day and prime time is appalling. Many children are home without parental supervision and it is not the responsibility for the parents to know each broadcast is "G" rated.

Since the Entertainment Industry (what is proper entertainment) cannot control the content of the value of their programs the FCC MUST set the rules for them. They may scream censorship and right to free speech but not at the expense of the public on public access/controlled airwaves. The Entertainment Industry has proved that it cannot govern its industry and has allowed lower and lower standards to broadcast their disgusting values to lower the values of our youth. This way they can influence the new generation that it is acceptable to broadcast this trash.

Europe has already fallen into destructive and deplorable ethical values regarding this issue. American is one of the only countries left where the quality of values still matters. However, those who control the programming in their respective industry are attacking these values daily. The Entertain and News Media agenda is only to sell advertising at any cost including the values of our children and ourselves.

You have the responsibility as the governing body to bring ethical values back into this industry. Please take on this trust of all parents and citizens.
